He said, however, that his examination of the assets satisfied him that the capital of the bank had been impaired to the extent of about \$370,000.

This is a conservative estimate," he said to a reporter of "The Evening Wo.id." If have thrown out everything in the way of securities about which there was the slightest doubt. The other assets have not been appraised above their market value.

"The bank officers seem to think that I have placed too low a value upon some of the assets and that I have thrown out some which are valuable.

"One of these items is the lease of the building in which the bank is logated. It has thirteen years to run, and President Blaut values it at \$100,000, as the rents from the tenants in the building amount to \$31,000 a year. I have not, however, included this in the assets.

"It is also proper to say that I regard all the securities held as collateral for the notes of Mr. Blaut and other directors of the bank as perfectly sound for the entire amount of the loans.

"The assets of the bank will thus cover all the liabilities excepting the capital stock. This is \$500,000, so that after paying depositors and other creditors there will be left about \$130,000 to be applied to the claims of stockholders.
